

## Evergreen Aviation Technologies Corporation Supply Chain Sustainable Development Policy

Evergreen Aviation Technologies Corp. (hereinafter referred to as “EGAT”) upholds the corporate spirit of “Challenge, Innovation, Teamwork” and maintains a commitment to rigorous service quality. With “Safety First, Quality is Everything” as its core values, EGAT aims to become a benchmark aircraft maintenance and manufacturing company with global influence. EGAT invites all suppliers and partners to work together in expanding internationalization, enhancing competitiveness and economic growth while also considering ESG (Environment, Social and Corporate Governance) for sustainable corporate development. Following international initiatives, industry norms, and local regulations as basic requirements, EGAT promotes management of business ethics, environmental protection, and labor rights protection. To ensure compliance, EGAT has issued the “Supply Chain Sustainable Development Policy” for all suppliers and partners to adhere to.

1. We are committed to upholding labor rights and complying with labor standards wherever we operate, while providing fair compensation and benefits to workers and fostering a culture of inclusion and respect.
2. We aim to improve awareness and capabilities in occupational safety, hygiene and health. We improve workplace safety, provide safety protection devices to prevent occupational hazards, and create a safe, healthy and high-quality working environment.
3. We jointly protect natural resources and biodiversity, avoid the use of hazardous substances, save energy and water, promote recycling and reuse, and reduce greenhouse gas emissions. We adopt efficient operating methods to minimize adverse impacts on the environment.
4. We adhere to the highest ethical and moral standards, maintain integrity and reliability, and practice business ethics in our business operations and transactions.
5. We take responsibility for protecting information. We adopt security maintenance and control measures for application systems, databases and other media required for business activities. We pay attention to and protect personal privacy when transmitting personal information to ensure that there is no risk of leakage of information.
6. We strictly control the quality and safety of the supply chain, strengthen auditing, traceability and risk management, improve transparency, and ensure product compliance and customer trust.

## Evergreen Aviation Technologies Corporation Supply Chain Sustainable Development Policy

7. We establish management standards that comply with relevant laws and regulations and the requirements of this policy to ensure that requirements such as codes of conduct and sustainable procurement for suppliers are implemented to improve ESG performance.
8. We establish risk control and response measures for corporate operations to achieve sustainable corporate development.
